EXPERIENCE

Co-founder

Nov 2024 – Present

Datamind Labs

Remote

- Led **end-to-end development** of a SaaS AI analytics platform with a natural language bot and interactive dashboard, enabling clients to query business data intuitively.
- Architected & built scalable backend (Django, FastAPI) with **secure auth, advanced analytics, RBAC (role-based access control) and APIs** - delivering **99% uptime**
- Developed responsive frontend with secure authentication, dynamic dashboards, and client organization & user management, achieving a **~10% landing page to discovery call conversion rate** in the initial growth phase.
- Integrated **OpenAI and Anthropic APIs** to develop a **natural language chatbot** capable of understanding and responding to user queries, leveraging **prompt engineering, LLM function calling and tool-use**
- Built a WhatsApp chatbot using **Twilio APIs** for authentication, **real-time alerts**, and **on-demand analytics**, enabling users to access custom insights anytime and in any language.
- Deployed & scaled using **AWS Elastic Beanstalk, EC2, and RDS**, built CI/CD pipelines from scratch to enable automated testing and **zero-downtime deployments**.

Software Engineer

Mar 2024 – Nov 2024

Neosoft Technologies

Pune, India

- Engineered & optimized mission-critical logistics and finance systems for one of India's largest cargo service providers, **improving nationwide delivery efficiency**.
- Developed enhanced tracking and financial recovery systems for lost packages, increasing transparency, resolution speed and safeguarding revenue at **pan-India scale**.
- Built & deployed high-performance data pipelines and **containerized microservices** (Node.js, PostgreSQL, Docker) **handling millions of financial records with full integrity**.
- Automated large-scale financial discrepancy settlements by writing optimized cron job scripts, enabling secure reconciliation of **millions of records in a single run**.
- Optimized ORM-level queries and connection handling, reducing redundant DB calls and **lowering execution time by over 90%-97%**, significantly decreasing database load.

Software Developer

Oct 2022 – Mar 2024

STARTWITH BASICX

Remote

- Developed & maintained high-traffic **React/Express/Node.js/TypeScript** applications serving **500K+ users**, ensuring scalability, performance, and resilience.
- Engineered a fund management system (Django, React, TypeScript) that streamlined allocation workflows, **reducing workflow completion time by ~70%** and improving overall operational accuracy.
- Deployed multiple applications with DNS-based **load balancing** via Cloudflare Workers, ensuring **low latency** and **high availability** for users across regions.
- Collaborated with international clients across U.S. and Australian time zones, delivering high-impact solutions and ensuring seamless operations in distributed teams.
- Built fully automated CI/CD pipelines, **cutting release cycles by ~40%** and improving deployment reliability.
- Designed responsive, accessible frontends with state management best practices, **lowering UI-related support tickets by ~20%** through improved usability and user experience.

TECHNICAL SKILLS

Programming & Query Languages: JavaScript, TypeScript, Node.js, Python, SQL, GraphQL

Frameworks & Libraries: React, Next.js, Express.js, Django, FastAPI, Nginx, Tailwind CSS, Redux, jQuery

Databases & Storage: PostgreSQL, MongoDB, SQLite

DevOps & Cloud: AWS (EC2, RDS, S3, Elastic Beanstalk), Cloudflare, Docker, Nginx

Developer Tools: Git, GitHub Actions, Postman, Jest, CI/CD Pipelines, RESTful APIs

EDUCATION

Aston University

Birmingham, United Kingdom

Master of Science in Business Analytics

Jan 2021 – Jan 2022

SRM Institute of Science and Technology

Chennai, India

Btech in Automotive Engineering

Aug 2016 – Jul 2020
